ARAFAT MUGHAL

Full-Stack Developer

Lahore, Pakistan | +92 313 2555703 | arfat.bjs@gmail.com

Portfolio | GitHub | LinkedIn | WhatsApp

PROFILE

Full-stack developer with experience since 2019 building Laravel applications, React interfaces, REST and GraphQL APIs, and business integrations. Recent delivery includes conversational procurement automation, AI-enabled business platforms, and container-based release workflows. Open to full-time opportunities and freelance projects.

TECHNICAL SKILLS

Web & APIs: PHP, Laravel, React, Redux, Vue.js, Next.js, REST, GraphQL, Apollo Client, Inertia.js, Livewire, Filament, WordPress, HTML, CSS, Tailwind CSS, Bootstrap, jQuery.

Data & delivery: MySQL, Git, GitHub Actions, Docker, GHCR, nginx, environment separation, health checks, deployment rollback.

AI & integrations: Copilot Studio, Power Automate, Dataverse, Power Apps, Dynamics 365 F&O, Teams, Entra ID, NetSuite, Microsoft Graph / SharePoint, Claude API, payment gateways, social login. Additional experience with AI bots and animation.

PROFESSIONAL EXPERIENCE

Laravel Developer | BJS Softsolution, Lahore

July 2019 - Present

- Build REST and GraphQL APIs and connect Laravel backends to React / Redux and Apollo Client interfaces.
- Develop web applications, administrative tools, and integrations for payments and social authentication.
- Deliver procurement workflows, enterprise integrations, and release automation across the projects below.

RECENT DELIVERY HIGHLIGHTS

Autolus Buying Assistant | Conversational procurement demo

- Delivered a sentence-to-purchase-order workflow using Copilot Studio, Dataverse, Power Automate, Dynamics 365 F&O, Teams, and Power Apps.
- Connected 28 buying categories to financial coding, rate-card estimates, routing, draft orders, and approval workflows through four automated flows. The end-to-end demo passed 18 of 18 tests.

GenieWorks | AI business platform & deployment automation

- Delivered Laravel and Next.js container releases using GitHub Actions and GHCR, with off-server builds, health checks, deployment locking, backups, and automatic rollback.
- Created isolated staging with masked data and restricted database access; added encryption-key consistency checks and audited company-level controls for NetSuite posting.
- Configured environment-specific integrations for a platform supporting AI invoice review, template-based SOW drafting, and SharePoint documents.

SELECTED WORK & BACKGROUND

SELECTED PROJECTS

Bechly.pk | Marketplace, web & Android | Mar - Jul 2026

Classifieds platform connecting a Laravel backend, web experience, and Android app, with location search, moderation, and notifications. Stack: Laravel, Filament, Livewire, REST APIs. Website | Google Play
